

MATEUSZ SZCZEPAŃSKI

A versatile professional with almost 5 years experience in Test Automation, Quality Assurance, CPE Deployment, and DevOps, specializing in networking, automation, and CI/CD. Passionate about problem-solving and the real-world applications of math, physics, and computer science.

Known for a proactive and customer-focused approach, I thrive in dynamic environments, embracing new challenges and expanding my technical expertise, especially in Automation field. Actively engaged in professional communities and workplace initiatives, fostering collaboration and innovation.

EDUCATION

University of Wrocław (2018-2023)

MSc, Applied Mathematics

TECH STACK

- **Python3** (OOP, PyTest, SciPy, scikit-learn, PyTorch, Selenium, PyQt5, Qiskit, OpenCV, API development)
- **Networking & Connectivity** (WiFi, Access Points, IPv4, IPv6, Mesh solutions, OpenSync, 802.xx standards, Wireshark)
- **CI/CD & DevOps** (GitLab CI, Jenkins, GitHub Actions)
- **Testing & QA** (Manual & Automated Testing, ISTQB principles, XTest)
- **Git** (GitHub, GitLab, Gerrit)
- **AI tools** (Copilot, Claude, OpenClaw)
- **TypeScript, JavaScript, Astro, Bun, Vercel, OVH, Playwright**
- **Linux & Embedded Systems** (Bash, Ubuntu, RDK-B, RDK-V, RDK-E, PrpIOS, OpenWRT, RPIs)
- **Containerization & Virtualization** (Docker, OCI, CRUN, LXC, colima)

EXPERIENCE IN CONSULT RED SINCE 07.2021

Test Automation Engineer > 1 year (currently)

Test automation lead using an internal pytest-based framework (Python3, containers, C++, cloud) for UI testing. Designed automated test flows for OS data-migration features (e.g. RDK-E) on STBs and Smart TVs, delivered component, integration, and E2E tests in virtual and real-device environments. Defined test plans, coordinated test strategy and led team testing activities. Maintainer of the internal remote setup.

- **Embedded Systems:** SmartTVs, Set-Top Boxes (RDK-E, RDK-V)
- **CI/CD:** GitLab CI, GitHub Actions
- **Automation & Testing:** Python, PyTest, Docker
- **Methodologies:** Agile with Kanban elements
- **Other:** Audio & Video, IP Networks, Figma, MITM proxy, REST API, C++, Slack Webhooks, Test design and strategy, Colima

DevOps Engineer / CICD Specialist ~ 1 year

Designed, built, and maintained CI/CD pipelines for routers, access points, and set-top boxes. Developed architectural overviews, optimized build systems, and automated workflows to enhance efficiency. Managed build servers, implemented automation, and integrated testing solutions for growing products.

LANGUAGES

English: Intermediate

Polish: Native

SOFT SKILLS & PERSONAL ATTRIBUTES

- **Highly adaptable, proactive, and quick to learn new technologies.**
- Strong time management and organizational skills.
- Effective communicator with the ability to engage clients and collaborate seamlessly with colleagues.
- Experienced in leading training sessions (telemetry, networking, Python).
- Onboarded >10 new team members to the project structures and technologies.
- Actively participates in workplace communities such as **Infrastructure and Cloud Tech Group**, **Employee Representative** initiatives.
- One of the main **Broadband Sales Engineering** community member led by the CTO. Participant in several pre-sales activities.
- **RDK Summits** participant.
- Prefers a hybrid work model (3/2 or 4/1 office/remote).

CERTIFICATES

ISTQB Certified Tester

Foundation Level, id: 93625 [2022]

More certificates can be found below:

github.com/mszczepanskigit/Certificates

CLAUSE

I agree to the processing of personal data provided in this document for realising the recruitment process pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation).

- **Embedded Systems:** Routers, Set-Top Boxes (RDK-B, PrpIOS, RDK-V, OpenWRT)
- **CI/CD:** GitLab CI, Jenkins, GitHub Actions
- **Build Systems:** Yocto, Buildroot
- **Automation & Scripting:** Bash, Python, Docker
- **Testing: Playwright** (GUI automation), JavaScript
- **Methodologies:** Primarily Waterfall with Agile elements
- **Other Technologies:** OpenSync, Wi-Fi, Mesh Solutions, PrplWare

CPE Deployment Engineer ~ 1 year

Led the deployment of a large-scale CPE device for a Tier-1 ISP in Europe, managing over 1 million deployed units. Coordinated with international teams, handled engineering and deployment processes, and provided technical support in development and (pre)production environments. Facilitated customer engagement, issue resolution, and technical/non-technical meetings to ensure seamless product rollout.

- **Embedded Systems:** Cable Modems (RDK-B, DOCSIS, Linux, OpenSync)
- **Project Management:** Jira ticketing, pseudo-Agile workflows
- **Data Analysis:** Telemetry gathering and reporting
- **Other Technologies:** OpenSync, TR-69, TR-181, USP, Wi-Fi, Elastic

Quality Assurance Engineer ~ 2 years

Performed in-development testing for the Connectivity and OTT Apps teams, focusing on manual and automated testing. Managed defect tracking, created and improved test cases and suites. Contributed to overall product quality, ensured smooth integration, certification of popular streaming applications and new WiFi drivers within new hardware.

- **Platforms:** Set-Top Boxes (RDK-V, Android)
- **Testing & QA:** Manual testing, defect management, test case creation
- **Automation:** Python, PyTest, Robot Framework
- **Networking:** IP Networks, Wi-Fi, Remote Control, Access Points, Mesh solutions, Linux
- **OTT Applications:** Certification and validation (Disney+, YouTube, Amazon Prime, WebApps)
- **Methodologies:** Agile with Kanban elements
